

Dear Roger

I understand that you are preparing to start up your own company and I wish you every success.

Over the past 25 years we have worked together on numerous projects, notably getting gas to AP7 and the new supply to AP2, which subsequently was enlarged and extended to feed the Combined Heat and Power Plant. This 140,000 cu ft/hr feed is probably the largest that Weetabix has or will again see!

I would not hesitate to recommend you to any other company. I have always found you efficient, helpful and very adaptable, as when we worked through the night to get a temporary gas supply to AP1 so production could start up on time.

I hope your new venture is a resounding success and to that end please feel free to use this testimonial as you wish.

Yours sincerely

Alan Bull  
Development Engineer
